

Tier 3 Part 3 Lesson 3 Notes: Test Taking Techniques

Take the test in a relaxed mode.

You want to take the test in a steady and methodically way.

Do not panic!

Do the easy problems first.

Mark the more difficult questions with a 2.

Mark the questions that puzzle you with a 3.

Completing the easiest questions first will help you relax and give you confidence.

Next, work on the more difficult questions you marked with a 2.

Next, work on the questions that puzzled you and you marked with a 3.

If a question “stumps” you, skip it and go back to it if you have time. Don’t let that question get you panicked or anxious.

If you don’t know how to answer a question, it’s okay. Skip the question and use the time available to check your answers.
